PROFESSIONAL SUMMARY

BCA graduate currently pursuing a Postgraduate Program in Data Science and Analytics with GenAI at Imarticus Learning. Building hands-on knowledge in Python, SQL, Advanced Excel, Power BI, Statistics, Exploratory Data Analysis, Data Visualization, Machine Learning, Deep Learning and Generative AI through coursework and projects. Seeking an entry-level Data Analyst opportunity.

EDUCATION

Imarticus Learning, Bengaluru — Postgraduate Program in Data Science and Analytics with GenAI

Sri Vijay Vidyalaya College of Arts & Science — Bachelor of Computer Applications (BCA), 2021–2024 | CGPA: 8.7

HSC: 58% | SSLC: 80.4%

INTERNSHIP EXPERIENCE

Web Designing Intern — TCDA

- Learned basic web development concepts, HTML and CSS fundamentals, and standard web development practices.

Python Programming / Data Science Intern — MAKE VISION AI SOFTWARE & DEVELOPMENTS

- Gained practical exposure to Python programming, data analysis, data visualization and machine learning fundamentals through mini-project work.

CAPSTONE PROJECTS

Machine Failure Prediction — Capstone Project

- Developed a machine-failure classification model using air temperature, process temperature, rotational speed, torque and tool wear.
- Performed data preprocessing and EDA including data-quality checks, feature analysis, correlation analysis and stratified train-test splitting.
- Compared Logistic Regression, Random Forest and XGBoost using Accuracy, Precision, Recall and F1 Score; selected XGBoost based on Recall and F1 Score.
- Used SHAP and feature importance for model interpretability and deployed an interactive Streamlit application for predictions, explanations and recommendations.

Live Demo: [Streamlit App](#)

Traffic Accident Dashboard — Capstone Project — Power BI

- Developed an interactive dashboard to analyze US traffic accident data from 2016–2023.
- Analyzed accident patterns by time, location, weather and environmental factors; created state-level, city-level and trend visualizations.
- Implemented KPIs, slicers, dynamic Top-N analysis, Pareto analysis and cross-filtering to identify peak accident periods and high-risk locations.

PROJECTS

Medical / Health Insurance Premium Prediction

- Developed a machine learning model to predict health insurance premiums based on customer demographic and health-related factors.
- Performed data preprocessing and exploratory data analysis to identify key factors influencing insurance premiums.

- Applied regression techniques using Python and Scikit-learn and evaluated the model performance.
- Used Pandas, NumPy, Matplotlib, Seaborn and Scikit-learn for data analysis, visualization and model development.
- Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Academic Project — Animal Detection in Farming Areas

- Developed a CNN-based animal detection system to identify animals in farming areas from images.
- Performed image preprocessing and classification using Python and deep learning techniques.
- Integrated voice alerts using pyttsx3 to notify farmers when animals are detected.
- Technologies: Python, CNN, TensorFlow, OpenCV, Pyttsx3.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analytics: Advanced Excel, Statistics & Probability, Exploratory Data Analysis (EDA), Data Visualization, Power BI

Machine Learning: Machine Learning concepts, model development and evaluation

Deep Learning: Deep Learning fundamentals and image classification

Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook, Git, GitHub, VS Code, Streamlit, Power Query, DAX

Generative AI: Generative AI Applications

PRESENTATIONS, WRITING & ACTIVITIES

- Delivered individual and group presentations on topics covered during the Post Graduate Program in Data Analytics using Generative AI.
- Published a Medium article, “Why Does One Person Pay More for Health Insurance? A Machine Learning Approach to Predict Insurance Premiums,” based on a machine learning project completed during the program.
- Participated in a Data Science Competition, applying analytical and problem-solving skills to a data-driven challenge.

CERTIFICATIONS

- IBM SkillsBuild — Generative AI for Business and Professionals
- IBM SkillsBuild — Data Visualization with Python
- IBM SkillsBuild — Data Analysis with Python
- Python Data Science with MongoDB Workshop
- Python Programming Internship — MAKE VISION AI SOFTWARE & DEVELOPMENTS
- Web Designing Internship — TCDA
- Naan Mudhalvan Online Courses

ACHIEVEMENTS & LEADERSHIP

- University Rank Holder — recognized for academic performance.
- Class Representative — represented the class and supported academic communication and activities.

SOFT SKILLS & LANGUAGES

Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Adaptability, Time Management, Quick Learning

Languages: Tamil, English
